

Trackalign 2 Wheel Laser Aligners

Part No.: GTR/50
*See overleaf for
more information*

- Precision engineered
- Highly accurate measurement front wheel toe
- Rapid set up time
- 2 year warranty
- Camber & caster measurement options
- Heavy duty version available for LCV

Trackalign 2 Wheel Laser Aligners

→ About the GTR/50

The Trackalign GTR/50 2 Wheel Laser Alignment system is an easy to use measurement system for measuring front wheel toe (tracking). The system is designed for use in workshops and tyre shops where a quick assessment of this essential vehicle geometry measurement is required.

Setting up on the vehicle takes a matter of seconds and reading results is a simple and quick process. Using the optional digital camber caster gauge values for KPI (SAI), caster, and camber angles can be calculated to a tolerance of +/- 0.1°

Trackalign GTR/50 positions the measuring heads just a few centimetres off the ground, this feature allows the unit to be used with vehicles fitted with low ground clearance front spoilers, splitters and body styling kits. GTR/50 can be used on vehicles fitted with wheels ranging in size from 300 up to 620mm (dependent upon tyre aspect ratio).

The GTR/50/HD can be used on light commercial vehicles with a maximum wheel diameter of up to 890mm. Turning plates, pedal applicator, steering wheel clamp and wall mounted frame can be supplied as optional extras.

→ Technical Specifications & Dimensions

Wheel assembly size range.....	300-620mm
Laser - auto power off, low voltage indicator.....	Category B
Low voltage power off.....	9.6V NiMH (Nickel Hydride)
Battery charger.....	12V
Power supply.....	230V
Measurement tolerance.....	+/- 0.1 degrees

→ Part Nos. & Ordering Information

Trackalign 2 wheel laser alignment system.....	GTR/50
Trackalign 2 wheel, LCV laser alignment system.....	GTR/50/HD

→ Options & Accessories

Turn disc set.....	GTR/400/2008
Steering wheel clamp.....	GTR/400/2010

Issue No.: GTR/50 June 2017
